Ecosostenibilità Sustainability

L'acqua è da sempre il simbolo della vita, di purezza. La maggior parte della superficie terrestre è costituita da acqua, di cui solo una piccola quantità è acqua dolce. L'inefficienza e le perdite dei sistemi di distribuzione ne diminuiscono in maniera massiccia la quantità effettivamente erogata. Per questo, una maggiore attenzione ai consumi e un'educazione alla riduzione degli stessi, ci può meglio aiutare a preservare nel tempo questa importante risorsa. Apell ha concepito perciò un percorso di produzione che, mantenendo ai livelli più elevati qualità ed estetica, tiene conto delle necessità ambientali e del risparmio delle risorse.

Water has always been the symbol of life, of purity. Most of the earth's surface is covered in water, only a small amount of which is fresh water. Inefficiency and leaks in distribution systems result in the amount of water actually dispensed being reduced considerably. Conserving this important resource for generations to come thus requires a greater focus on how we use water and education on how to reduce its consumption. With this in mind, Apell have devised a production path that takes into account environmental requirements and the need to save resources, while still maintaining the highest standards of quality and aesthetic content.

Il design non si manifesta come espressione estetica fine a se stessa, bensì come sintesi tra la necessità pratiche e l'adozione di una veste formale evoluta e riconoscibile. Una metaforica firma apposta su ogni pezzo delle collezioni Apell.

Rather than aesthetic expression for its own sake, design is a synthesis between practical needs and the adoption of a well developed and recognizable "shell". A metaphorical signature applied to every item of the Apell collections.

È facile da pulire.
Con una minima manutenzione i prodotti in acciaio inox possono conservarsi come nuovi nel tempo.

È meccanicamente resistente.
I prodotti realizzati in acciaio inossidabile resistono agli urti ed all'abrasione.

È resistente alla corrosione.
Un film auto-rigenerante, lo protegge dal fenomeno della corrosione e consente alla superficie di ripararsi immediatamente anche quando graffiato.

It is hygienic.
The compactness of the metal surface makes accumulation and survival of bacteria difficult. This is the main reason why stainless steel is widely used in kitchens.

It is mechanically resistant.
Products in stainless steel withstand knocks and abrasions.

It is ecological.

A self-regenerating film on the surface, protects it from corrosion and enables the surface to repair itself instantly even when scratched.

Gent.le Cliente,

siamo lieti di informarLa che il lavello Sinphonia è stato pre - selezionato per il premio “Il Compasso d’Oro”.

Il “Compasso d’Oro ADI” istituito nel 1954 è il primo e il più autorevole premio europeo del settore ed ha lo scopo di valorizzare la qualità del design italiano. Il premio viene assegnato sulla base di una preselezione effettuata da una commissione di esperti (critici, storici, progettisti, giornalisti specializzati) impegnati con continuità nel raccogliere informazioni, valutare e selezionare i migliori prodotti.

Ogni anno la commissione assegna agli oggetti selezionati la denominazione di qualità “ADI Design Index” e li segnala al pubblico in un annuario che porta lo stesso titolo.

Ogni tre anni la giuria internazionale del Compasso d’Oro sceglie gli oggetti da premiare esclusivamente tra quelli che, nel triennio precedente, sono stati pubblicati su “ADI Design Index”. È proprio su tale pubblicazione è stato inserito il lavello Sinphonia di Apell.

Questa segnalazione rappresenta per noi la conferma della bontà della strada intrapresa verso la continua ricerca e la creazione di oggetti ad un tempo eleganti e raffinati nella forme e nei materiali, versatili e funzionale nell’utilizzo di tutti i giorni.

Vorremo cogliere questa opportunità per rivolgere il nostro ringraziamento a tutti i nostri Partner che con continuità e con il lavoro di tutti i giorni portano questi concetti sui loro mercati di riferimento.

The hide away drainer

The original "hidden away drainer" adds stylistic refinement to the overall design, thus eliminating the unpleasant round shape of traditional drainers, and providing stylistic coherence to the minimalistic design of the sink. The special 3 mm stainless steel drain outlet covers, provides the bowl bases with a perfect unique straigh surface, ensuring that even small items and Glasses are kept erect.

Il sistema di piletta a scomparsa

L'originale "sistema di piletta a scomparsa" conferisce coerenza stilistica al lavello e alla cucina eliminando le forme tonde della piletta poco integrabili con i concetti progettuali minimalisti del Sinphonla. Le speciali coperture in acciaio inox con 3 mm di spessore, inoltre, rendono il fondo del lavello completamente piano, adatto a poggiare qualsiasi oggetto.

Sfera propone un nuovo concetto di lavello con vasche a Raggio Minimo. L'essenza del progetto è di chiudere il lavandino quando non in uso fornendo un senso generale di ordine a tutta la cucina. Infatti, i Taglieri scorrevoli in vetro e acciaio, quando sono chiusi, forniscono un aspetto di pulizia nascondendo piatti e bicchieri che aspettano di essere posti nella lavastoviglie. Gli stessi taglieri risulteranno utilissimi nella preparazione dei cibi nonché molto facili da pulire. Il design futuristico è stato esteso anche alla piletta che incorpora un coperchio di acciaio che aggiunge un tocco stilistico supplementare.

Sfera provides a new concept of Minimum radius bowl design. The essence of the project is to close the sink when not in use, providing an overall sense of tidiness to the whole kitchen. Its steel and glass chopping boards, when closed, can hide the plates and glasses yet to be put in the dishwasher. Besides preparing food, the boards are very easy to clean. Its futuristic design encompasses its steel lid covered drain.

Trasformare il lavello da un semplice accessorio della cucina ad un sistema di lavaggio articolato capace di scomparire quando non utilizzato: è questa la missione affidata a questa gamma progettata e realizzata per un pubblico esigente ma ad un costo accessibile. Iris è la versione più conveniente dei famosi lavelli "a scomparsa" della Apell.

Come una Lavastoviglie che si integra perfettamente quasi scomparendo nel contesto del mobile, così questo lavello, quando non utilizzato, si integra con il top aumentandone la superficie di appoggio grazie agli eleganti coperchi scorrevoli.

Iris is an amazing sink that can be turned into a complex washing tool and yet, concealed when not in use. This sink was designed for an exigent market and at a bargain price. Iris is the cheapest of the hide-away sinks from Apell.

Just like a dishwasher which can perfectly fit into the furniture design of the kitchen, this sink, when not in use, expands the surface of worktop thanks to its elegant sliding boards.

Pietra Zero

Incasso _ Built-in

La serie Pietra Zero ha un design pulito, caratterizzato dalle ampie vasche che permettono il lavaggio anche delle stoviglie più voluminose. Il materiale di cui sono composti ha una superficie molto simile alla pietra naturale, in grado di ritardare la formazione del calcare, con uno straordinario effetto seta al tatto, risultando estremamente solido e semplice da pulire.

The Pietra Zero design is neat. Its wide bowls allow the washing of voluminous dishes. Its stone-like material holds off calcium deposit and its smooth surface provides ease of cleaning. Touching the sink, you will get an extraordinary silky feeling.

Avvertenze Warnings

I nostri lavelli sono realizzati in acciaio austenitico che – in condizioni normali di utilizzo – è metallurgicamente non ossidabile. Ciononostante, bisogna fare attenzione ad alcune situazioni. La principale caratteristica di questo acciaio è che l’ossigeno presente nell’aria si combina con l’acciaio stesso ricoprendo qualsiasi superficie esposta con una specie di pellicola protettiva che ripara l’acciaio istantaneamente anche in caso di graffi.

a – Contatto con Detergenti a base di Cloro. Il cloro reagisce chimicamente con l’acciaio inossidabile e porta a fenomeni di ossidazione. Alcuni detergenti normalmente in commercio hanno una base cloridrica. Attenzione: anche i vapori di cloro (liberati per esempio da confezioni di detergenti non sigillate) possono portare all’ossidazione. Pertanto: EVITARE DI UTILIZZARE DETERGENTI A BASE DI CLORO E – NEL CASO – PROVVEDERE AL RISCIAQUO CON QUANTITÀ ABBONDANTE DI ACQUA. NON CONSERVARE DETERGENTI A BASE CLORIDRICA NEL SOTTOLAVELLO.

b – Contatto prolungato con il sale. Il normale sale da cucina contiene Cloro (NaCl); se del sale rimane a lungo a contatto con l’acciaio inossidabile, si possono avere fenomeni di corrosione. Pertanto: RIMUOVERE EVENTUALI RESIDUI DI SALE PRESENTI SUL LAVELLO.

c – **Contatto con altri elementi ossidati.** Se l’acciaio rimane fisicamente a contatto con qualche oggetto ossidato, si possono avere fenomeni locali di corrosione. Questa situazione può capitare in special modo nel corso di lavori di ristrutturazione eseguiti quando il lavello è già installato. Pertanto: PROTEGGERE LA SUPERFICIE DEL LAVELLO NEL CORSO DI LAVORI DI RISTRUTTURAZIONE DELLA CUCINA.

Our sinks are manufactured with austenitic stainless steel, which is metallurgically unable of rusting or corroding in normal household conditions. The main feature of these steels is that the oxygen in the atmosphere combines with stainless steel to coat any exposed surface with a sort of protective film, which “repairs” itself instantly even if the surface is scratched. Nevertheless, there may appear rust areas if one of these cases are applied:

a – Contact with Chlorium based detergent. Chlorium does chemically reacts with stainless steel and drives to rust. A number of commercially available detergents do contain chlorium; notice that even vapour of Chlorium detergent (e.g. bottle of detergent without cap) leads to rust. Therefore :DO NOT USE CLORIUM BASED DETERGENTS, AND – IN CASE OF INCIDENTAL USE – CLEAN IMMEDIATELY WITH BIG AMOUNT OF WATER. REMOVE PLEASE, ANY CLORIUM BASED DETERGENT FROM THE AREAS AROUND AND BELOW THE SINK

b – Prolonged contact with cooking salt. Cooking salt contains Chlorium (Chemical formula is NaCl); if any salt remains for sometime on the surface, it leads to rust. Therefore: REMOVE IMMEDIATELY ANY REMAIN OF SALT ON THE SINK SURFACE.

c - **Contact with rust elements or iron powder.** If stainless steel sink gets in touch with any rusty elements (e.g. rusty screw) or iron powder, the surface below gets rusty as well. This situation usually happens during restoring activities of the house / Kitchen, when personnel works on the house / Kitchen restoring and do not pay attention on the sink itself. Therefore, PROTECT THE SINK SURFACE DURING ANY RESTORING ACTIVITY PERFORMED IN THE HOUSE / KITCHEN.

Tipologie

- 

Incasso Bordo 6 / Bordo 8 / Bordo 10

Il numero indica l'altezza in mm del bordo del lavello rispetto alla superficie del piano di lavoro su cui poggia.
- 

Incasso Semifilo

In questa particolare categoria di lavelli da incasso, il bordo esterno sottile e inclinato rende l'estetica più pulita ed elegante.
- 

Incasso Flat

È un particolare sistema di incasso in cui il bordo esterno non è piegato, ma piatto e appoggia semplicemente sul piano di lavoro.
- 

Sottotop

Il lavello è montato dal basso, in corrispondenza di un foro incasso molto preciso da praticare con la dima di foratura in dotazione. Gli appositi ganci spingono il lavello contro il top e la guarnizione garantisce la tenuta.

Finiture

- 

Finitura satinata

Questa finitura conferisce all'acciaio brillantezza e facilità di pulizia.
- 

Finitura antigraffio

La trama antigraffio protegge la superficie del lavello da urti ed abrasioni.
- 

Finitura micro-antigraffio

Nuova finitura, caratterizzata da una trama discreta che abbinata estetica e resistenza.
- 

Finitura spazzolato

Questa finitura rende l'acciaio brillante, perfettamente abbinato al resto degli elettrodomestici.

Fitting

- 

6-Edge / 8-Edge / 10-Edge Inset

The sink frame is raise by respectively 6mm, 8mm or 10mm above the kitchen surface, and the rim is perpendicular to the work-top.
- 

Thin-Edge Inset

The slimmer, sloping profile of this inset sink results in a more stylish look.
- 

Flat Inset

A peculiar inset system where the sink edge is flat and laid on the work-top.
- 

Undermount

The sink is fit to the kitchen from below. A template is supplied in the packaging to allow a very close cut out, while a set of brackets are provided to push the sink up against the gasket which seals the gap with the work-top.

Finishes

- 

Satin finish

The finish result in a shiny, easily maintained surface.
- 

Linen finish

The linen pattern serves as a protection against accidental scratches.
- 

Micro-Linen finish

This new subtle pattern matches durability and style.
- 

Brushed finishing

This treatment gives to the steel the best finishing, suitable to combine sinks with appliances.
